

# Land Use Policy

<http://www.elsevier.com/locate/landusepol>

LAND USE POLICY is an international journal covering all aspects of land use. The editor invites contributions on political, social, economic and legal aspects of urban and rural land use. These can be full-length articles (which are refereed before publication) or shorter pieces for the Reports or Viewpoints sections. Information on work in progress, publications and meetings is welcomed. Views expressed in the journal are not necessarily those of the editor or those of the international editorial board.

## EDITOR
